SKILLS

- Kotlin / Java
- Compose / CustomView
- Dagger2 / Koin
- Retrofit2 / Moshi
- Coroutines / Flow
- Jetpack from Google
- Clean Architecture / MVVM / MVI
- Git / Jira / Scrum / Kanban
- JUnit / Mockito

EDUCATION

SHEVCHENKO STATE UNIVERSITY

Qualification: Degree in Engineering.

2010 - 2015

COLLEGE OF INFORMATICS AND LAW

Qualification: Degree in Computer complexes and networks

2005 - 2009

LANGUAGE

English - Intermediate
Russian - Native

EXPERIENCE

ANDERSEN LAB https://andersenlab.com/

Position: Main Android developer

June 2021 - Present

- Spearheaded the development of Android applications, ensuring high-quality code and adherence to best practices.
- Collaborated with cross-functional teams, including designers, product managers, and backend developers, to gather requirements and deliver exceptional user experiences.
- Designed and implemented scalable API architectures, optimizing performance and data retrieval for the mobile applications.
- Developed and maintained robust project architectures, enhancing stability and scalability.
- Implemented CI/CD processes to streamline development, testing, and deployment workflows, reducing time-to-market for new features and updates.
- Utilized design patterns and code reuse techniques to write efficient and maintainable source code.
- Resolved complex technical issues and challenges by devising innovative solutions, resulting in improved application performance and user satisfaction.

EXPERIENCE

SYSTEM TECHNOLOGIES https://st.by/

Position: Lead Android developer

December 2019 - June 2021

- Led a team of Android developers in the successful delivery of high-quality mobile applications.
- Estimated project tasks, set timelines, and allocated resources to ensure efficient project execution.
- Designed and implemented robust API architectures and ensuring seamless integration with the mobile applications.
- Developed and maintained scalable project architectures, focusing on stability and performance.
- Actively participated in code reviews, providing feedback to team members to improve code quality, maintainability, and adherence to best practices.
- Collaborated closely with cross-functional teams, including product managers, designers, and backend developers, to gather requirements, define project scope, and deliver exceptional user experiences.
- Effectively communicated project progress, challenges, and solutions to stakeholders and management, ensuring transparency and alignment across teams.
- Set up and implemented CI/CD processes to streamline development, testing, and deployment workflows, resulting in improved productivity and shorter time-to-market.
- Created and published builds, ensuring smooth and reliable distribution of the applications to internal and external stakeholders.

CORAL TEAM

Position: Android developer

February 2019 - December 2019

- I supported existing projects, starting with 1 project and eventually supporting 5 projects.
- I gained my first experience in starting a project from start and choice technology stack and architecture.
- I migrated a project from Java to Kotlin, which reduced the number of errors due to NPEs to a minimum.
- I gained experience working with WebRTC and developing applications with a kiosk mode.
